

4 kg Grease Pump for Industrial Lubrication

This 4 kg grease pump is designed for efficient lubrication in industrial and automotive applications. It features a high-pressure delivery system and robust construction for long-term durability.

Product Overview

Industrial Lubrication Solution

This heavy-duty grease pump is engineered for efficient lubrication in demanding industrial and automotive environments. It features a robust construction designed for durability and long service life, ensuring reliable performance in workshops and maintenance operations. The unit includes a high-pressure delivery system and ergonomic handling, providing versatile access to lubrication points for effective maintenance.

Technical Specifications

Operating Air Pressure

0.3 MPa
Min Pressure

0.9 MPa
Max Pressure

Grease Capacity	400 cc
Air Inlet	1/4"
Hose Diameter	3/8"

Physical Attributes

Net Weight	1.3 kg
------------	--------

Features

Key Features

High-pressure delivery • Robust construction • Ergonomic handle • Industrial grade
