

4-Meter Hydraulic Sheet Metal Bending Machine

This 4-meter hydraulic bending machine is designed for folding, straightening, and leveling metal sheets. Featuring a hydraulic system, it delivers consistent and powerful bending force across its 4-meter working length.

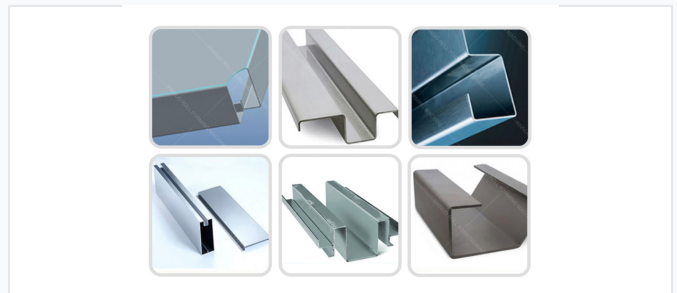

ADDITIONAL IMAGES

Overview

The robust frame and hydraulic cylinders ensure powerful and accurate bending for various metal profiles.

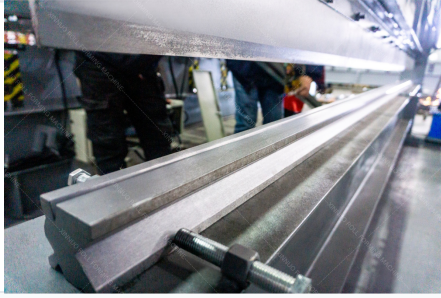

Capable of producing a wide range of custom profiles for construction and manufacturing.

Versatile 4-Meter Hydraulic Bending Solution

This automatic hydraulic bending machine is engineered for high-precision metal forming, including bending, folding, straightening, and leveling of metal sheets. With a substantial 4-meter working length and a robust hydraulic system, it delivers consistent power and accuracy for industrial-scale fabrication. Designed for versatility, the machine can be customized to meet specific client requirements, making it an ideal choice for automotive, construction, and general manufacturing applications.

Technical Specifications

Close-up of the hydraulic system designed for consistent force across the 4-meter working length.

Key Performance Metrics

4 m

Bending Length

2 mm

Max Thickness

Available Configurations

- Manual Bending Machine
- Hydraulic Bending Machine
- CNC Bender

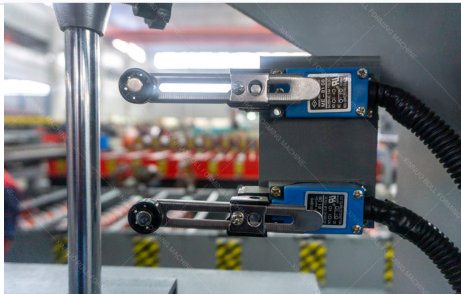

Physical Dimensions

3000 x 600 x 1200 mm

Compatible Materials

Steel, Aluminum, Stainless Steel, Drywall Roof Iron Sheet

Components & Build

High-quality industrial limit switches used for precise position detection and automated control.

Control Components

Component	Model/Rating	Features
Limit Switch	ME-8108 (5A 250VAC / 0.4A 115VDC)	Roller lever arm actuator for position detection

Safety & Operational Features

- Emergency stop buttons
- Light curtains for operator protection
- User-friendly control panel
- Adjustable tooling for various angles

Service & Logistics

Global shipping available via major carriers including DHL, FedEx, and TNT.

Warranty

12 Months Limited Warranty

Global Technician Dispatch

Technicians can be sent to the buyer's country for machine installation and fixing. The buyer is responsible for visa costs, round-trip airfare, accommodation, and a daily salary of 80 USD per technician.

Payment Terms

30% T/T down payment, 70% T/T after inspection before delivery

Lead Time

30 days after receipt of advance payment

Compliance

Full compliance with ISO 9001:2008 and CE standards for international safety and quality.

Quality Standards

CE Certified, ISO 9001:2008, Alibaba.com Assessed Supplier
