Product Overview

Professional HVAC Magnetic Contactor

This 4-pole magnetic contactor is specifically engineered for definite purpose applications within HVAC and refrigeration systems. Designed to provide reliable switching for inductive loads such as compressors and fans, this unit ensures optimal performance and longevity in demanding electrical environments. The contactor features a robust construction suitable for residential, commercial, and industrial HVAC equipment.

Technical Specifications

Rated Current

40 A

Rated Current

Pole Configuration	4 poles
Coil Voltage	24V AC
Frequency	50/60 Hz
Application Type	HVAC, Refrigeration, Motor Control, Inductive Loads

Quality & Service

Service Terms

- 100% self-inspection and testing before packing
- OEM and ODM services available
- Replacement policy for quality issues

Quality Assurance	Yes
-------------------	-----

Logistics

Delivery Time	15-20 days after deposit
Payment Terms	30% deposit, balance against B/L copy
