

4-Pole AC Magnetic Contactor

This AC contactor is a 4-pole magnetic switch suitable for various electrical applications. It is designed to meet electrical and mechanical requirements for definite purpose contactors.

Product Overview

Reliable 4-Pole AC Magnetic Contactor

This 4-pole AC magnetic contactor is engineered for robust performance in demanding electrical environments. Featuring a compact size and reinforced thermoset polyester housing, it ensures durability and quiet operation. Designed to meet international safety standards, this component is an ideal solution for HVAC systems and industrial machinery requiring dependable circuit switching.

Technical Specifications

Electrical Life (Resistance Load)	250000 cycles
Electrical Life (Horsepower Load)	100000 cycles
Mechanical Life	1000000 cycles
Coil Insulation Class	Class B

Features & Construction

Key Features

- Compact Size
- Weld-resistant Silver Cadmium Oxide Contacts
- Reinforced Thermoset Polyester Housing
- Quiet Operation
- Contact Covers and Taped Coils Standard

Power Termination Options

Lugs, SEMS Clamp, Binding Head Screws, Quick Connects

Compliance & Standards

Certifications

UL File E246810 • CSA File 256361 • CE Approved • ARI-780
