

4-Pole Isolator Switch

This 4-pole isolator switch is designed for reliable circuit isolation. It provides a visible open gap for safety during maintenance.

Product Overview

Professional Switch Disconnecter

This 4-pole switch disconnecter is engineered for high-performance circuit isolation in industrial and commercial electrical systems. It provides a reliable mechanical break to ensure safety during maintenance and repair activities. The robust design supports high current loads, making it an essential component for demanding power distribution applications.

Technical Specifications

High-capacity 100A four-pole switch disconnecter for industrial applications.

Rated Current

100 A

Rated Current

Application Power Ratings

Application Type	Power Rating
AC-7a	60 kW
AC-7b	22 kW

Pole Configuration

4-Pole

Standards Compliance

IEC/EN 61095, IEC/EN 60947-4-1, CE

Origin

Place of Origin

Zhejiang, China
