

4-Port Gigabit Ethernet Optical Network Unit

The 4GE Port ONU (Optical Network Unit) is designed for high-speed data transmission in fiber optic networks. It features four Gigabit Ethernet ports for connecting multiple devices, providing reliable and efficient network connectivity.

Product Overview

High-Performance Optical Network Unit

The PTF1354 is a 4GE Port ONU designed for high-speed data transmission in fiber optic networks. It features four Gigabit Ethernet ports for connecting multiple devices, providing reliable and efficient network connectivity. This unit is an ideal solution for residential and small business applications that require high bandwidth and stable, consistent performance.

Technical Specifications

Connectivity Features

- 4x Gigabit Ethernet Ports
- High-speed data transmission
- Stable network performance

Gigabit Ethernet Ports	4 ports
Network Type	Fiber Optic
Target Applications	Residential, Small Business
