

## 4-Stroke Gasoline Engine ET35

The ET35 is a 4-stroke gasoline engine designed for applications requiring reliable power. This compact and efficient engine features an overhead cam (OHC) design for improved performance and fuel economy.

### Overview

#### Compact 4-Stroke Performance

The ET35 is a reliable 4-stroke gasoline engine engineered for versatility and efficiency. Featuring an overhead cam (OHC) design, it delivers consistent power for demanding applications like brush cutters, tillers, and small portable generators. Its robust, lightweight construction and easy-start recoil system ensure dependable operation in various working conditions.

### Technical Specifications

#### Max Power

**1 kW**

Max Power

**6500 r/min**

Rated Speed

Cylinder Diameter	39 mm
Discharging Capacity	35.8 cc
Carburetor Type	Diaphragm

### Operational Details

Fuel Tank Capacity	0.6 L
Net Weight	4 kgs
Key Features	4-Stroke, OHC Design, Recoil Starter
