

4-Ton Horizontal Log Splitter

The 4-ton horizontal log splitter is a powerful tool designed for splitting logs efficiently. It features a robust hydraulic system that delivers 4 tons of splitting force, making it suitable for a variety of wood types and sizes.

Overview

Efficient Log Splitting Performance

The 4-Ton Horizontal Log Splitter is a robust and efficient tool designed to streamline firewood preparation. With 4 tons of splitting force and a 1500W motor, it handles logs up to 370mm in length and 250mm in diameter with ease. Its horizontal design offers enhanced stability, making it a reliable solution for residential wood processing needs.
