Overview

High-Performance Underground Loader

The WJ-2G is a robust diesel-powered underground wheel loader engineered for efficient material handling in demanding mining environments. Featuring a 2m³ bucket volume and a 4-ton loading capacity, it is specifically designed for tunnel sections of at least 2.5m x 2.5m. The machine utilizes high-quality imported engine and hydraulic components to ensure reliability, performance, and durability in narrow, confined spaces.

Performance Metrics

Core Performance

2 m³

Bucket Volume

3800 kg

Max Loading Capacity

1800 mm

Max Dumping Height

Technical Specifications

Machine Specs

Parameter	Specification
Total Weight	12500 kg
Engine Power	84 kW
Max Shovel Force	95 kN
Turning Radius (Outer)	5150 mm
Dimensions (LxWxH)	7500x1750x2100 mm

Certifications

Quality & Compliance

CE, QS9001, CA

Operational Capabilities

Traveling Speeds

- Shift I: 0~3.4 km/h
- Shift II: 0~6.5 km/h
- Shift III: 0~14.0 km/h
