Overview

Reliable Power Distribution

The GTLS Series distribution box is designed for safe and efficient electrical power control in residential, commercial, and light industrial environments. Built with high-quality steel and a durable powder-coated finish, it ensures long-lasting performance and corrosion resistance. Its wider enclosure design simplifies wiring installation and improves heat dissipation, making it a practical choice for service entrance equipment.

Technical Specifications

Rated Current

100 A

Max Rated Current

Service Voltage	120/240 Vac
Phase Configuration	Single-phase, three-wire
Breaker Compatibility	GE type 1' THQL breakers

Construction & Design

Steel Sheet Thickness	0.5 - 1.2 mm
Finish	Matt-finish polyester powder coated
Mounting Styles	Flush Mounted, Surface Mounted

Installation Features

Knockout Locations

- Top
- Bottom
- All sides
