

40-500mm Wire Rod Peeling Machine

This machine is designed for peeling wire rods with diameters ranging from 40mm to 500mm. It is also capable of straightening wire and steel bars.

Overview

High-Precision Wire Rod Peeling Solution

This advanced wire rod peeling machine is engineered for high-performance steel processing, capable of handling diameters ranging from 40mm to 500mm. Designed with proven innovation and world-class technology, the system ensures precision and efficiency for industrial steel bar applications. It serves as a reliable solution for professional metalworking environments requiring consistent quality and durability.

Technical Specifications

Processing Diameter Range

40 mm

Minimum Diameter

500 mm

Maximum Diameter

Centerless Lathe Models

BP-80, BP-40, BP-150, WC-250

Straightening Calender Models

JP-15, JP-50, JP-80, JP-150

Capabilities

Core Machinery Functions

- Steel Bar Peeling
- Centerless Lathe Processing
- Steel Bar Straightening
