Overview

High-Efficiency Self-Loading Mixer

This multifunctional self-loading concrete mixer combines the capabilities of a transit mixer, concrete mixer, and wheel loader into one versatile unit. Designed to automatically load, measure, mix, and discharge, it streamlines on-site concrete production. With its 4-wheel drive and 2-wheel steering, it offers excellent maneuverability for construction sites, rental operations, and maintenance projects.

Performance

Concrete Output per Batch	3.5 m ³
Geometric Drum Volume	5.3 m ³
Max Daily Output	112 m ³

Technical Specs

Engine Power	85 kW
Mixing Unit Slewing	270 °
Discharge Height	2 m
Drive System	4-Wheel Drive, 2-Wheel Steering

Key Features

Operational Features

Automatic Loading • Automatic Measurement • Automatic Mixing • Automatic Discharge

Design Highlights

- Wide cabin windscreen for improved visibility
- Specially designed loading arms
- High-discharge capability on all four sides
- Compact design for confined spaces
