

40-Foot High Cube Refrigerated Shipping Container

This 40-foot high cube refrigerated shipping container is designed for the transportation of temperature-sensitive goods. It features a robust steel frame, insulated walls, and a high-performance refrigeration unit to maintain precise temperature control during transit.

Overview

Professional Cold Chain Solution

This 40-foot high cube refrigerated shipping container is expertly engineered for the secure transportation of temperature-sensitive goods. Featuring a robust steel frame and advanced thermal insulation, it provides a reliable environment for perishables. It is an essential asset for maintaining product integrity across food, pharmaceutical, and high-value supply chains during both sea and land transit.

Technical Specifications

Transport Modes

- Sea Transport
- Land Transport

Container Type	40-Foot High Cube Refrigerated
Industry Applications	Food Logistics, Pharmaceuticals, Perishables, Cold Chain

Features

Core Features

- High-performance refrigeration unit
- Robust steel construction
- Advanced wall insulation
- Precise temperature control
