

## 4.0 HP 2-Stroke Water Pump

This compact water pump features a powerful 2-stroke engine suitable for drainage and irrigation. The 4.0 HP engine delivers sufficient power for various pumping applications.

### Product Overview

#### Compact Power for Water Management

This 4.0 HP 2-stroke water pump is engineered for efficient irrigation and drainage operations. Featuring a robust 106cc single-cylinder air-cooled engine, it delivers reliable performance for demanding agricultural tasks. Its lightweight design and recoil start mechanism make it highly portable and easy to deploy in various environments.

### Engine Performance

#### Max Output

**4 HP**

Power Output

**4000 rpm**

Rated Speed

#### Engine Technical Data

Parameter	Value
Displacement	106cc
Bore x Stroke	52 x 50mm
Engine Type	Single cylinder, 2-Stroke, Air cooled
Start Mode	Recoil

### Fuel and Capacity

Fuel Capacity	3.2 L
Engine Oil Capacity	0.6 L
Fuel Type	Unleaded gasoline

### Certifications and Features

Key Features	Air Cooled, Recoil Start, 2-Stroke Engine, Compact Design
