

4.0 HP Gasoline Water Pump

This water pump is a reliable solution for water transfer needs. It features a durable construction and a powerful 4.0HP 2-stroke engine for efficient performance.

Overview

Professional Performance Overview

This 4.0 HP gasoline water pump provides a robust solution for high-capacity water transfer in agricultural, construction, and domestic environments. Featuring a powerful 2-stroke air-cooled engine, it delivers efficient water flow and reliable operation. Its compact and portable design is paired with a sturdy frame to ensure stability and ease of use in demanding field conditions.

Performance Metrics

Flow Capacity

650 L/min

Max Capacity

22 m

Total Head

6 m

Max Suction Head

Technical Specifications

Port Dimensions

- Suction port: 50mm (2 inch)
- Discharge port: 50mm (2 inch)

Engine & Fuel

Feature	Specification
Engine Type	2-stroke, air cooled
Power Output	4.0 HP
Fuel Type	Unleaded gasoline
Tank Capacity	3.2 L
Starting System	Recoil

Physical Attributes

Dry Weight	25 kg
Recommended Uses	Agriculture, Construction, Domestic Water Transfer, Irrigation, Drainage
