

40 LBS Soda Blaster for Surface Cleaning

This 40 LBS soda blaster is designed for efficient cleaning and surface preparation. It features a durable tank, adjustable pressure regulator, and media metering valve for precise control.

Product Overview

Professional Soda Blaster

This 40 LBS soda blaster is engineered for efficient surface cleaning and preparation tasks. It features a robust, durable tank design paired with precise controls, including a media metering valve and an adjustable pressure regulator. The unit is versatile enough to remove paint, rust, and various coatings from surfaces such as metal, wood, and fiberglass.

Technical Specifications

Tank Capacity	40 LBS
Working Pressure (WP)	250 PSI
Burst Pressure (BP)	500 PSI

Key Features

Included Components

- Durable tank
- Adjustable pressure regulator
- Media metering valve
- Pressure gauge
- Air filter
- PVC pressure air hose
- Fittings

Performance Benefits

Moisture Removal • Consistent Media Flow • Precise Control • Accurate Monitoring

Applications

Compatible Surfaces	Metal, Wood, Fiberglass
Cleaning Capabilities	Paint Removal, Rust Removal, Coating Removal
