

400-Foot Jack-Up Drilling Platform

This self-elevating mobile offshore drilling unit (MODU) is designed for operations in water depths up to 400 feet. The jack-up platform features a robust hull structure with legs that can be lowered to the seabed, providing a stable drilling platform.

Overview

High-Performance Jack-Up Drilling Platform

This 400-foot jack-up drilling platform is a self-elevating mobile offshore drilling unit (MODU) engineered for reliable performance in harsh offshore environments. Designed for versatility, it supports drilling operations and well workovers in water depths up to 400 feet. With a robust hull structure and deep-drilling capabilities, it offers a stable and effective solution for offshore energy exploration and maintenance.

Technical Specifications

Delivery Year	2008
Dimensions	70.35m x 76.00m x 9.45m
