

# 400A Pole Mountable Fused Cutout

This pole mountable fused cutout provides rural dwellings with a safe, protective, and reliable low voltage power supply. It features bronze fuse contacts and cable terminal plates with M12 captive studs for cable sockets up to 300mm<sup>2</sup>.

## ADDITIONAL IMAGES

## Product Overview

### Reliable Low Voltage Protection

This pole-mountable fused cutout is engineered to provide rural dwellings with a safe and reliable low voltage power supply. Designed for durability, the unit features bronze contacts with tin coating to ensure long-term performance and effective circuit interruption. It supports versatile installation options, including wall, wooden pole, or cross-arm mounting, making it a flexible solution for various electrical distribution network architectures.

## Technical Specifications

### Rated Current

**400 A**

Rated Current

<b>Fuse Link Compatibility</b>	Standard-wedge type fuse link to BS88 part 5
<b>Fuse Rating Range</b>	20A to 400A
<b>Fixing Center</b>	82 mm
<b>Category of Duty</b>	415AC80

## Construction & Materials

<b>Contact Material</b>	Bronze with tin coating
<b>Conductor Compatibility</b>	Copper, Aluminium
<b>Terminal Studs</b>	M12 captive studs

## Installation

### Mounting Options

- Wall mounting
- Wooden pole mounting
- Cross-arm mounting
