

400G RO Water Filter Purifier

This water filter purifier utilizes reverse osmosis to produce 1 liter of purified water per minute. Its composite filter and large 400G capacity make it suitable for home use.

Product Overview

High-Efficiency Water Filtration

This advanced water purifier delivers a high 400G water capacity with a 1L/min flow rate, allowing for immediate consumption after filtration. It utilizes a 3-in-1 composite filter system paired with reverse osmosis technology to effectively remove chemical residues, bacteria, and particles. Designed for convenience, the system features a 2:1 low wastewater ratio and a smart three-color light reminder to track filter lifespan.

Technical Specifications

Water Output Speed

1 L/min

Output Rate

Rated Voltage	220V
Power Consumption	60 W
Noise Level	48 dB
Dimensions	245x245x380mm

Filtration System

Filtration Stages

- Folded PP Cotton
- Carbon Rod
- Silicon Phosphorus Crystal
- RO Reverse Osmosis Membrane

Filter Maintenance Schedule

Filter Type	Lifespan
Composite Filter (PP/Carbon/Silicon)	12 Months
RO Reverse Osmosis Filter	24 Months
Carbon Rod	12 Months

Installation & Environment

Operating Temperature	5-45 °C
Mounting Options	On stage, Under the kitchen sink

Features

Status Indicators

Green (Normal) • Yellow (Maintenance Soon) • Red (Replace)
