

400mm Abrasive Cut-off Saw

This 400mm cut-off saw is designed for efficient and precise cutting of metal profiles. It uses a high-speed abrasive cutting wheel and a sturdy clamping mechanism for clean cuts.

Overview

Robust Metal Cutting Solution

The 400mm Abrasive Cut-off Saw is a heavy-duty machine engineered for precision and durability in demanding workshop environments. Constructed with a high-quality cast iron body and base, it minimizes vibration to ensure clean, accurate cuts across steel, aluminum, and various metal profiles. Designed for both safety and mobility, the unit features an integrated clamping mechanism, a protective wheel guard, and built-in wheels for easy transport.

Technical Specifications

Cutting Wheel Diameter	400 mm
Construction Material	High-quality cast iron

Features

Mobility & Mounting

- Integrated wheels for easy transport
- Bolt-down base for stable operation

Safety Features	Wheel Guard, Emergency Stop Switch, Secure Clamping Mechanism
-----------------	---

Performance

Suitable Materials

Steel • Aluminum • Metal Pipes • Metal Bars • Metal Profiles
