

400W Monocrystalline Solar Panel

This 400W monocrystalline solar panel is designed for solar energy systems. It uses advanced cell technology to maximize energy conversion and ensure reliable performance.

Product Overview

High-Efficiency Solar Solution

This 400W monocrystalline solar panel is engineered for high-performance energy conversion in both residential and commercial solar systems. Utilizing advanced cell technology, it provides a reliable and sustainable energy source for various environments. The panel is versatile enough to support both grid-tied and off-grid configurations, making it a cost-effective solution for energy independence.

Technical Specifications

Rated Power

400 W

Maximum Power

Cell Type

Monocrystalline

Applications

Supported Systems

Residential, Commercial, Grid-tied, Off-grid
