

40A Earth Leakage Circuit Breaker

This 40A earth leakage circuit breaker is designed for electrical safety, providing protection against earth leakage faults. It features a test button for functional verification and an on/off switch for circuit control.

Product Overview

Professional Electrical Safety

This 40A Earth Leakage Circuit Breaker is designed to provide robust protection against earth leakage faults in electrical systems. Engineered for reliability, the unit includes a physical test button for routine functional verification and clear on/off switching for manual circuit control. It is manufactured to meet rigorous international standards for safety and performance in professional electrical installations.

Technical Specifications

Rated Current

40 A

Rated Current

Rated Voltage

400 V

Rated Residual Operating Current (I_{Δn})

30 mA

Standards Compliance

IEC 61008-1, EN 61008-1

Features

Key Functional Features

- Manual test button for verification
- On/Off switch for circuit control
- Earth leakage fault protection
- Standardized DIN-mount form factor
