

40A IP65 Rated Isolating Switch

This isolating switch is designed for electrical power applications within transmission and distribution systems. It provides a reliable means of disconnecting electrical circuits for maintenance or safety, featuring a high-visibility red and yellow handle and a durable enclosure.

Overview

Professional Isolation Solution

The 40A IP65 Rated Isolating Switch is a high-performance load break switch designed for demanding electrical environments. Engineered for safety and reliability, it serves as a critical component for air-conditioning and pump systems, providing secure circuit disconnection for maintenance and emergency stop operations. Its robust, weather-resistant enclosure ensures consistent performance even in challenging conditions.

Technical Specifications

Ingress Protection Rating

IP65

Typical Applications

- Air-conditioning systems
- Pump systems
- Main circuit disconnection
- DC circuit isolation

Rated Current

40 A

Compliance Standards

IEC 947-3, DIN VDE 0113, DIN VDE 0660, EN 60 947-3

Switch Type

Manual load break isolating switch

Design Features

Design Features

- High-visibility red and yellow handle
- Compact size
- Rotary ON/OFF operation
- Durable environmental enclosure
