

40A Three-Pole Contactor

This three-pole contactor is designed for HVAC&R applications, especially air conditioning systems. It is rated for 40A and provides reliable switching for motor control and other electrical loads.

Product Overview

Professional Grade Three-Pole Contactor

This three-pole contactor is engineered for demanding HVAC&R environments, offering robust control for air conditioning and refrigeration systems. It features high electrical longevity and wide compatibility with various motor and resistive loads. Designed for reliability, this component ensures consistent performance across diverse operational voltages.

Technical Specifications

Rated Current

40 A

Full Load Amps

Rated Voltage 24V - 480V

Number of Poles 3

Performance & Durability

Electrical Life (Resistance Load) 250000

Electrical Life (Horsepower Load) 100000

Mechanical Life 1000000

Logistics & Compliance

Country of Origin China

Certifications CE, UL, CSA
