Overview

Robust 40ft Flatbed Solution

This 2-axle 40ft flatbed container semi-trailer is engineered for the efficient transport of standard shipping containers and heavy-duty cargo. Built with a robust steel frame, it offers exceptional durability and load-bearing capacity for demanding logistics operations. The design features a versatile flatbed surface, integrated container locking systems, and heavy-duty suspension, providing a stable and reliable solution for long-haul transportation.

Technical Specifications

Length	40 ft
Axle Configuration	Dual Axle
Frame Material	Robust Steel

Features & Safety

Safety Equipment

- Side marker lights
- Rear brake lights
- Reflective safety markings

Key Features

Container Locks, Heavy-Duty Suspension, Landing Gear, Corrosion-Resistant Coating

Application

Suitable Industries

Logistics • Shipping • Construction • General Transportation
