

4.0G Reverse Osmosis Water Storage Tank

This 4.0G reverse osmosis water storage tank is designed for household water dispenser systems. It maintains optimal pressure for efficient water delivery in reverse osmosis setups.

Product Overview

High-Capacity RO Water Storage

This 4.0G Reverse Osmosis water storage tank is designed for reliable water delivery in residential and commercial purification systems. Engineered for durability and consistent performance, it ensures a steady supply of purified water on demand. The unit is compatible with standard reverse osmosis setups and is built to handle typical household water pressure requirements.

Technical Specifications

| | |
|--------------------------|-----------|
| Tank Capacity | 4 Gallons |
| Maximum Working Pressure | 100 psi |
| Recommended Air Charge | 5-7 psi |

Compatibility & Usage

Available Series

- 2.0G
- 3.0G
- 3.2G
- 4.0G
