

# 40L Thermoelectric Cooler and Warmer

This 40L cooler and warmer box utilizes PU foam for insulation. It can cool to 18 -22 below ambient temperature and warm to +65 via a set-point thermostat.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Thermal Management

This 40L portable cooler and warmer box is designed for versatile use in cars, trucks, and RVs, making it an essential companion for road trips, camping, and outdoor activities. It utilizes an efficient thermoelectric system to maintain food and beverages at optimal temperatures on the go. With a durable construction and convenient split-lid design, it offers both reliability and ease of access for your travel needs.

## Technical Specifications

### Cooling Performance

**22 °C**

Below Ambient Temp

### Capacity

40 L

### Heating Performance

65 °C

## Features

### Key Features

- Thermoelectric cooling system
- Dual-function: Cooler and Warmer
- Split lid design for easy access
- Integrated airflow vents
- Durable plastic construction

### Ideal For

Road Trips, Camping, Picnics, Automotive Use
