

# 41-Inch Thinline Cutaway Acoustic-Electric Guitar Kit

This 41-inch thinline cutaway acoustic-electric guitar kit is suitable for both beginners and experienced players. It has a built-in pickup and preamp, allowing connection to an amplifier or PA system.

## Overview

### Professional Acoustic-Electric Experience

This 41-inch thinline cutaway acoustic-electric guitar kit offers a versatile solution for musicians seeking a balance between acoustic resonance and amplified performance. Designed with a slim profile for comfortable playability, it features a spruce plywood top paired with basswood back and sides for a balanced tonal character. The integrated 7545R EQ system allows for seamless connection to amplifiers or PA systems, making it an excellent choice for both practice and live performance environments.
