

41.5cc 1.47kW Gasoline Engine

This gasoline engine has a 40mm cylinder diameter and a 41.5cc discharging capacity. It delivers a maximum power of 1.47kW at 7000rpm and features a 1.2L fuel tank.

Overview

High-Performance Gasoline Engine

This 41.5cc gasoline engine delivers reliable power for a variety of general machinery applications. Engineered for durability and efficiency, it features a compact design that allows for seamless integration into existing equipment. With a maximum power output of 1.47kW, it is built to handle demanding tasks while maintaining consistent performance.

Technical Specifications

Max Power

1.47 kW
Max Power

Cylinder Diameter	40 mm
Discharging Capacity	41.5 cc
Fuel Tank Capacity	1.2 L
Carburetor Type	Float
Net Weight	4.2 kg

Performance

Rated Speed	7000 r/min
-------------	------------
