

420cc Gasoline Engine for Power Generation

This 420cc gasoline engine is designed for power generation applications. It features an overhead valve (OHV) configuration for improved efficiency and performance.

Overview

High-Performance 420cc Gasoline Engine

This 420cc gasoline engine is engineered for reliable power generation, offering a robust 15HP to 16HP output suitable for professional and home applications. Designed with an overhead valve (OHV) configuration, it ensures improved efficiency and consistent performance. Key safety features include an automatic low oil level cut-off system, while its design prioritizes low fuel consumption, reduced noise levels, and environmental compliance.

Technical Specifications

Power Output

15 HP

Minimum Horsepower

16 HP

Maximum Horsepower

Starting Mechanism

Recoil Start • Electric Start

Engine Displacement

420 cc

Features & Maintenance

Air Cleaner Maintenance

Condition	Interval
Standard Use	Every 50 hours
Dusty Conditions	Every 10 hours

Operational Benefits

- Low fuel consumption
- Low noise operation
- Energy saving design
- Reliable and durable construction

Safety Features

Automatic Low Oil Cut-off, Carbon Monoxide Warning
