Overview

Reliable Power Generation

This 42.5 kVA diesel generator set is engineered for consistent and dependable performance in various industrial and commercial applications. Built with a robust four-cycle engine and a high-efficiency brushless three-phase synchronous alternator, it ensures stable power output. The system includes comprehensive monitoring instrumentation and advanced protection features for safe, long-term operation.

Performance

Rated Capacity

42.5 kVA
Rated Power

Engine Configuration	4-cycle, fan-cooled radiator
Alternator Type	Brushless three-phase synchronous

Control & Monitoring

Monitoring Instrumentation

- Volt meter
- Frequency meter
- A.C. ampere meter
- D.C. ampere meter
- Water temperature meter
- Oil temperature meter
- Oil pressure meter
- Fuel meter

Safety & Protection

High water temperature protection, High oil temperature protection, Low oil pressure protection, Over speed protection

Starting Methods

Manual, Electric, Automatic

Certifications

Compliance Standards

CE • ISO • TUV GS

Configuration Options

Available Customization

- Base fuel tank
- Silent enclosure design
- Fully automatic transfer switch (ATS)
- Automatic parallel system
