Overview

Reliable Standby Power Solution

This 42kVA single-phase generator set is engineered for dependable performance in both standby and prime power applications. Featuring a compact, weather-resistant enclosure and a soundproof canopy, it is ideal for noise-sensitive environments ranging from residential areas to industrial sites. The system is designed for high efficiency and low fuel consumption, ensuring a stable power supply during emergencies or in remote locations without grid access.

Performance Metrics

Key Performance Metrics

42 kVA Rated Power	46 kVA Standby Power	60 Hz Frequency	220 V Voltage
------------------------------	--------------------------------	---------------------------	-------------------------

Engine Specifications

Cooling Method	Closed water cooling or air force cooled
Starting Method	Electric start
Rotating Speed	1500 Rpm

Alternator & Electrical

Alternator Type	Brushless
Phase Configuration	Single-phase (supports 3-phase 4-wire configurations)
Power Factor	0.8

Applications

General & Emergency Use

- Residential backup power
- Camping and outdoor events
- Remote islands and deserts
- Natural disaster emergency equipment
- Indoor or outdoor installation

Industrial & Commercial

Real Estate, Hospital, Hotel, Bank, Construction, Factory, Oil Field, Airport, Mining, Railway, Telecom

Design Features

Enclosure Type

Soundproof Canopy • Weather Resistant • Compact Design • Protective Enclosure
