

43cc 2-Stroke Outboard Motor

This lightweight outboard motor is designed for small boats and inflatable crafts. It features a 43cc 2-stroke gasoline engine, providing efficient power for propulsion.

Product Overview

Compact 43cc Outboard Propulsion

This 43cc 2-stroke outboard motor is designed for versatility and reliable performance on small watercraft. Engineered for stability and ease of use, it features a robust 2-stroke engine capable of reliable starting even in high-temperature conditions. With safety-focused design elements like short-circuit protection and an aluminum 3-blade propeller, this motor is an ideal solution for recreational boating, fishing, and auxiliary power needs.

Engine Specifications

Engine Displacement	43 cc
Engine Type	2-Stroke
Fuel/Oil Mixing Ratio	1:25

Operational Features

Performance Metrics

43 cc Displacement	25 parts Fuel/Oil Ratio
------------------------------	-----------------------------------

Safety Features	Short circuit protection, Plug type flameout wire
Propeller	Aluminum 3T
Engine Compatibility	Interchangeable with brush cutters
