Product Overview

Efficient 4-Stroke Water Management

This portable 4-stroke water pump features a 43cc displacement engine, designed to provide reliable performance for drainage and irrigation tasks. Engineered for fuel efficiency and low-noise operation, it offers a practical solution for agricultural and general water transfer needs. Its compact, lightweight construction ensures easy transportation, while the sturdy frame provides necessary stability during operation.

Technical Specifications

Power Output

1.4 kw

Power

1.9 hp

Horsepower

Engine Displacement

43 cc

Engine Type

4-Stroke

Physical Attributes

Weight

9.5 kg

Key Features

Operational Benefits

- Fuel efficient 4-stroke engine
- Low noise operation
- Easy recoil start system
- Corrosion-resistant materials
- Portable and compact design

Ideal Applications

Drainage, Irrigation, Agricultural, Domestic Use, General Water Pumping
