Overview

Powerful Performance for One-Person Operation

This 43cc 2-cycle earth auger powerhead is engineered for efficient and reliable performance in various soil conditions. Designed specifically for single-person operation, it combines a robust engine with an ergonomic, anti-vibration handle system to reduce operator fatigue during demanding tasks like fence post installation and tree planting. Its durable, lightweight construction ensures consistent productivity for both professional landscapers and DIY enthusiasts.

Technical Specifications

Engine Displacement

43 cc

Engine Size

Engine Type	2-cycle
Auger Connection	0.875 inch
Model Number	GTC438

Design & Ergonomics

Handle Features

- Comfort grip
- Anti-vibration design
- Anti-slip coating
- Ergonomic layout

Control System

- Ergonomic throttle
- On/off switch
- Primer bulb for easy starting
- Easy-pull recoil starter

Safety & Operation

Safety Features

Throttle lock, Emergency stop switch, Bit locking mechanism

Primary Applications

Fence post installation, Tree planting, Soil sampling
