

45 ft Triaxial Goose Neck Skeleton Semi-Trailer Truck

This 45-foot triaxial goose neck skeleton semi-trailer truck is built for heavy-duty transport applications. It is optimized for carrying standard shipping containers and offers stable load distribution.

Overview

Heavy-Duty 45ft Skeleton Trailer

The 45-foot triaxial goose neck skeleton semi-trailer is engineered for robust, heavy-duty transport applications. Designed with a durable steel frame, it is optimized for carrying standard shipping containers efficiently. Its triaxial configuration ensures stable load distribution, while the goose neck design facilitates seamless coupling and uncoupling for port and logistics operations.

Technical Specifications

Trailer Length	45 ft
Axle Configuration	Triaxial
Design Type	Goose Neck Skeleton

Key Performance Metrics

Performance Highlights

150 units

Load Capacity

Features

Construction Features

- Durable steel frame construction
- Heavy-duty suspension system
- Goose neck coupling design
- Optimized for standard shipping containers

Ideal Applications

Port Operations, Logistics, Long-haul Transportation, Container Shipping
