Product Overview

Industrial-Grade Snagging Performance

This high-performance snagging grinding wheel is expertly engineered for heavy-duty material removal, making it an essential tool for foundries and fabrication shops. Designed with a 450mm diameter and 65mm thickness, it provides consistent results on diverse metal surfaces including castings, forgings, and weldments. Its robust construction ensures extended service life even under the most demanding industrial grinding conditions.

Technical Specifications

Outer Diameter	450 mm
Thickness	65 mm
Bore Diameter	50 mm

Application Details

Primary Applications

- Clutch piece of grinding ring
- Earing plane grinding
- Spring plane surfacing
- Material removal from castings and forgings
- Weldment cleaning

Ideal Industries

Foundry, Fabrication Shop, Steel Mill, Metalworking

Design Features

Build Quality

Embedded metal inserts • Aggressive material removal • High-durability design
