

# 450W Electric Blower for Debris Removal

This electric blower is a powerful and efficient tool designed for various cleaning and blowing applications. It features a robust 450W motor that delivers high air volume and velocity for effective debris removal.

## Product Overview

### High-Efficiency Debris Removal

This 450W electric blower is designed for versatile cleaning and debris removal applications across workshops, garages, and job sites. It features a lightweight, ergonomic build that minimizes user fatigue while providing the power needed for effective performance. The compact design ensures easy maneuverability in tight spaces, making it a reliable tool for professional maintenance and cleanup tasks.

## Technical Specifications

### Input Power

**450 W**

Input Power

### Voltage Compatibility

- 110-120V, 50/60Hz
- 220-240V, 50/60Hz

### No-load Speed

13000 rpm

## Features & Applications

### Key Design Features

Lightweight • Ergonomic Handle • Compact Size • Durable Nozzle

### Recommended Use

Workshops, Garages, Gardens, Construction Sites
