Overview

High-Performance Outboard Motor

This gasoline outboard engine is engineered for reliability and efficient power delivery in marine environments. Designed with a robust construction, it offers smooth operation suitable for both recreational boating and fishing activities. Its compact design ensures straightforward installation and handling for small to medium-sized watercraft.

Technical Specifications

Engine Displacement	452 cc
Fuel Type	Gasoline

Features

Key Features	Robust Construction, Compact Design, Efficient Fuel Consumption, User-Friendly Control System
--------------	---

Applications

Ideal For

- Recreational Boating
- Fishing
- Small to Medium-Sized Watercraft
