Overview

Versatile Agricultural Performance

The 454K Wheel Tractor is a robust agricultural machine engineered for diverse farming tasks including plowing, tilling, and hauling. It features a high-performance transmission with an 8+8 shuttle system for easier operation and increased efficiency. Designed for reliability, the tractor includes sealed axles for operation in water or deep mud and high-quality bearings for extended service life.

Technical Specifications

Tire Configuration

- Flat tire (standard)
- Paddy tire (optional)

Transmission System

8+8 Shuttle

Steering Configuration

Double steering cylinders on front axle

Braking Options

Air brake (optional)

Operational Comfort

Operator Environment

- ROPS & Canopy (standard)
- Cabin (optional)

Shift Mechanism

Light and convenient shift synchronizer

Build Quality

Durability Features

Sealed Axles • High-Quality Bearings
