

458cc OHV Engine

This 458cc OHV engine is designed for various applications. It features efficient combustion for reliable power and extended lifespan.

Overview

High-Efficiency 458cc OHV Engine

This 458cc OHV engine is engineered for reliable, stable power output across various demanding applications. It features a spherical combustion chamber design that optimizes fuel efficiency while reducing emissions. Built with a lightweight piston connecting rod system, the engine operates with minimal vibration, ensuring smoother performance and longevity.

Technical Specifications

| | |
|--------------|----------------------|
| Displacement | 458 cc |
| Engine Type | OHV (Overhead Valve) |

Key Features

Performance Features

- Spherical combustion chamber
- High combustion efficiency
- Low vibration design
- Stable power output
- Easy start mechanism

Maintenance & Safety

| | |
|--------------------|--|
| Ventilation System | Fully sealed design to reduce oil temperature and extend service life |
| Safety Warnings | Check oil before starting, Carbon monoxide hazard, Hot surface warning, Do not operate in enclosed areas |
