

45A Double Pole Switch with Neon Indicator

This 45A double pole switch includes a neon indicator for clear on/off status. Its design integrates the frame and middle seat, enhancing the product's strength and resistance to deformation.

Overview

High-Capacity 45A Double Pole Switch

This 1 Gang 45A Double Pole Switch is engineered for high-power applications, featuring a built-in neon indicator for clear visual status confirmation. Constructed from high-quality flame-retardant PC and premium brass components, it ensures maximum safety and durability for heavy-duty electrical circuits. The integrated frame design provides superior structural strength, preventing deformation during installation and long-term use.

Technical Performance

Electrical Ratings

45 A

Rated Current

250 V

Rated Voltage

Service Life

More than 10 years (tested for 40,000 switching cycles)

Standards Compliance

IEC 60669-1:2017, CE, CB, SASO, GCC

Physical Characteristics

Primary Materials

- High-quality Polycarbonate (PC)
- Brass conductive parts

Product Size

86 x 86 mm

Color

White

Product Features

The switch features a clean, white finish and a neon indicator for status monitoring.

Key Advantages

- Integrated frame and middle seat for enhanced strength
- Protective door design for increased electrical safety
- Clean, simple, and delicate aesthetic
- Neon indicator for visual power status
- Lower price point compared to standard BS products

Logistics & Supply

Packaging Configuration

Unit	Quantity
Inner Box	8
Export Carton	80

Minimum Order Quantity	3000 PCS
Accepted Payment Methods	T/T, L/C, RMB
