Product Overview

High-Performance Double Pole Switch

This 45A double pole switch is engineered to control both the neutral and live lines simultaneously, ensuring enhanced safety for high-power installations. Equipped with a built-in neon indicator, it provides clear visibility of the switch's working status at a glance. Built with robust red copper contacts featuring silver coating, it offers excellent electrical conductivity for reliable operation in demanding environments.

Technical Specifications

Safety Features

- Simultaneous Neutral and Live Line Control
- Neon Status Indicator
- High-Power Load Compatibility

Rated Current	45 A
Switching Mechanism	Double Pole
Contact Material	Red Copper, Silver Coated

Applications

Primary Use Cases

Air Conditioning Units • High-Power Appliances
