

48-Cavity Bottle Preform Mold

High-precision 48-cavity mold designed for manufacturing bottle preforms. This mold is engineered for efficient production, ensuring consistent quality and dimensional accuracy for each preform.

Overview

High-Precision 48-Cavity Preform Mold

This high-precision 48-cavity mold is specifically engineered for the efficient manufacturing of bottle preforms. Designed to withstand the rigors of high-pressure injection molding, it ensures consistent quality and dimensional accuracy across every unit produced. Its robust construction offers the longevity and reliability required for high-volume PET bottle manufacturing environments.

Technical Specifications

Cavity Count	48 cavities
Primary Application	PET bottle manufacturing
Industry Usage	Light Industry, Injection Molding, PET Packaging

Key Features

Performance Highlights

48 units

Cavity Capacity

100 %

High-Pressure Durability
