

4.8kW Diesel Power Generator

This diesel generator provides a reliable power source for various applications. It features a 4500W rated output and a 4800W surge capacity, with both AC and DC outputs.

Overview

Reliable Diesel Power Generation

This diesel-powered generator offers a robust and dependable solution for various power needs. Engineered with a durable frame for both protection and portability, it is designed to handle demanding environments. With a rated output of 4500 watts and a surge capacity of 4800 watts, it provides consistent performance for your equipment and appliances.
