

48V 20Ah Lithium-Ion Battery Pack

This 48V 20Ah battery pack is assembled using multiple single cells. It can be supplied with a battery management system (BMS), charger, and metal case based on customer design preferences.

Overview

High-Performance 48V 20Ah Battery Solution

This 48V 20Ah Lithium-Ion battery pack is engineered for reliable, high-capacity power delivery in demanding applications. Built using 96 high-quality 3.2V 3.5Ah 26700 cells, it offers a robust energy solution with a durable metal casing. The system is designed for longevity, supporting over 1,200 charge cycles while maintaining significant capacity, making it an ideal choice for professional-grade power requirements.

Electrical Specifications

Nominal Voltage	48 V
Nominal Capacity	20 Ah
Max Charge Voltage	10 A
Max Discharge Current	40 A
Cut-off Discharge Voltage	40 V
Internal Impedance	d 12h©

Performance Metrics

Performance Highlights

1200 cycles

Service Life Cycles

60 %

Retained Capacity

Physical Characteristics

Dimensions	260mm x 190mm x 155mm
Weight	12 kg

Operating Environment

Operating Temperature

Mode	Range
Charge	10°C ~ 45°C
Discharge	-20°C ~ 55°C

Compatibility & Accessories

Available Components	BMS, Charger, Custom Metal Case
