

4.8V Cordless Electric Screwdriver with LED

This 4.8V cordless screwdriver is designed for driving and removing screws. It features an easy-action forward/reverse switch and a pistol soft grip handle for comfortable use.

Overview

Versatile Cordless Screwdriver

The 4.8V cordless screwdriver is a compact and lightweight power tool engineered for precision and ease of use in various screwdriving tasks. Designed with ergonomics in mind, it minimizes user fatigue during extended operation, making it suitable for both professional and DIY environments. With features like variable speed control and an integrated LED work light, it offers reliable performance even in tight or dimly lit spaces.
