

48W Single Output Industrial Power Supply

This industrial power supply is designed for indoor applications requiring a stable DC power source. The unit accepts a wide range of AC input voltages and features overload, overvoltage, and short circuit protection.

Overview

Industrial-Grade Reliability

This 48W industrial power supply is designed for high efficiency and low-noise operation, making it suitable for a wide range of applications from aerospace to home appliances. It features a robust, perforated metal casing for superior heat dissipation and includes essential safety protections like overload and overvoltage safeguards. The unit offers flexible output voltage options to meet diverse system requirements.

Electrical Specifications

Available Output Voltages

- 5V
- 12V
- 15V
- 24V

Rated Power	48 W
Input Voltage Range	90-130VAC, 170-265VAC
Frequency	50/60Hz

Safety & Compliance

Integrated Protections

Overload Protection • Overvoltage Protection • Short Circuit Protection

Certifications	CE, RoHS
----------------	----------

Physical Dimensions

Dimensions (L x W x H)	159 x 97 x 38 mm
Casing Material	Perforated Metal
