Product Overview

Engine Core Component

This cylinder block crankcase serves as the foundational structural framework for the 4BT3.9 diesel engine. Precision-engineered to house the cylinders, crankshaft, and other vital internal components, it ensures optimal engine integrity and operational efficiency. Designed for durability and performance, this unit is an ideal choice for engine rebuilds, repairs, and maintenance projects requiring high-standard replacement parts.

Technical Details

Part Number	C4991816
Compatible Engine Models	4B, 6B, 6C, 6L, ISB, ISD, ISL, ISM, QSM, M11, ISF2.8, ISF3.8, K19, K38, K50, NT855, N14
Application	Automobile Engine
