

4D56 Engine Crankshaft

This crankshaft is designed for 4D56 engines, converting the linear motion of pistons to rotational power for the drivetrain. It is constructed from high-strength materials for durability and smooth engine operation.

Product Overview

Precision Engineered Crankshaft

This high-performance crankshaft is specifically designed for the 4D56 engine model, ensuring precise fitment and optimal performance. Engineered to convert the linear motion of the pistons into rotational motion, it powers the vehicle's drivetrain with efficiency. Constructed from high-strength materials, it offers durability and resistance to wear under high stress and demanding conditions, contributing to smooth engine operation and reduced vibration.

Technical Specifications

Application Suitability

Stock builds • Modified builds

Performance Benefits

- Optimal balance
- Extended engine life
- Reduced vibration
- Smooth operation

Engine Compatibility

4D56

Key Features

High-strength material, Precision-machined journals, Balanced design, OEM specification compliant
